

Magnetic Drive-Away Awning Fixing Kit – MP9512

INSTRUCTION MANUAL

- Ensure the magnetic kador strip and your vehicle are free from dirt before fitting.
- Position the magnetic side of the kador strip onto the side of the vehicle. Adjust the kador strip to achieve an even fit.
- It is recommended for maximum stability the magnetic strip is positioned on a level surface on the edge of the vehicle's roof as shown below:

- Insert the 3 x 1m figure of 8 extrusions onto the kador strip.
- Trim to fit your vehicle size if required.
- Using the integral straps; carefully secure the hook attachment to a suitable fixing point on the vehicle (ie chassis or wheel arch) as shown below. Avoid fitting hooks to loose objects or trim.

- Adjust the straps to achieve tension against the magnetic strip.
- Secure off any excess strap material using the adjusters.

- Before fitting your awning; ensure the straps are still secure and lightly tensioned.
- Insert your awning to the figure of 8 extrusion, erect the awning and tension fully.

Warning

- Do not drive your vehicle when the awning kit is attached.
- It is not recommended for use in high winds or exposed locations.
- Take extra care when fitting adjustable straps to avoid injury.
- Do not over tension the straps as this could damage the material.
- Do not leave the kit fitted to your vehicle for extended periods of time (months).
- If using stepladders or a platform you will be working at height and should follow carefully the stepladder / platform manufacturer's safety instructions. You should not attempt to fit it from the ladder but only to use the ladder if required to assist people on the ground.

Care of your Kit

- Allow the kit to dry completely before storing it in the bag provided.
- Brush or shake off any loose dirt before storing or re-using the kit.
- Do NOT machine wash or tumble dry this kit. Remove dirt with a soft sponge and warm water. Do NOT use detergent.
- Do NOT expose this cover to sparks, flames or other sources of ignition.
