

Technical improvement of the towbar wiring kit 747572: Now available for several RENAULT and DACIA models

To improve the versatility of our towbar wiring kit no. 747572, we have introduced significant technical improvements in the wiring harness and the trailer control unit. In addition to the RENAULT models, which the item already covers, it is now also applicable for all versions of the new DACIA Duster 3 (2024) and DACIA Bigster (2025).

The wiring kit is very easy to install as all models on the compatibility list include towing preparation connectors as a standard.

Our trailer control unit automatically adapts all safety and comfort functions associated with towing. Furthermore, the ECU of the vehicle does not require to be coded with diagnostic device.
